Folder Responsibilities

Folder	Purpose
config	Database, TypeORM, Paystack, Email configuration
entities	All TypeORM models (database tables)
controllers	Handle incoming HTTP requests and responses
services	Business logic lives here
repositories	Database queries using TypeORM
routes	API endpoints
middlewares	Authentication, authorization, error handling, uploads
utils	Helper functions (JWT, OTP, hashing, pagination, etc.)
migrations	Database migrations
seeders	Sample data for testing

Folder	Purpose
uploads	Uploaded listing images
docs	Project documentation (ER diagram, API docs, schema, Postman collection)
tests	Unit and integration tests
